Dear Judy and Sue,

What a great practical, user friendly, totally prepared classroom literacy program.

The program addresses in sequential order, sounds-blends-CVC's, listening, reading, decoding and spelling skills and develops punctuation and grammar skills. The students enjoy the structured activities and especially being able to see and show their progress through the workbooks. Believe it or not, a common question when students finish other work early is 'can we do DIPL', a big PLUS.

Teachers are totally supportive of the program, because it is very effective in catering for the wide range of student abilities confronting teachers every day. DIPL takes the pressure of programming away. All original work sheets and assessments are provided.

Students are enthusiastic about literacy.

We have found it takes about 5 weeks to become familiar and comfortable with the operation. Judy and Sue assist this with very good ongoing support and inservicing.

This is one of the few programs that I have no hesitation in recommending, it should be a departmental initiative to have it in every Primary school.

As the man says 'I'm excited'.
